For more efficiency the recorder can no longer be used and you are prompted to select the technology to be tested at the beginning of each recording and not open AUT for you.. Instead of creating individual test cases for different scenarios you can now use the same test but run child elements based on data sources and parameters without falling into the code.. How is done without To go to a technical dictation about the internal operation of EFI tuning we will at least agree with the basics of what AED to get such killers results without actually putting a finger on the car he reports.
